

MUNCH MOBILE™

IT'LL GRAB YOU

Just when fuel prices are coming down, along comes Munch Mobile™. Sure, he needs the precious fuel to keep going (you'll find it along the way), but if you really want to rack up a big score, you'll have to reach out (we'll get to that later) for the delicious foodstuffs along the road home. By the way, there are also some big bucks to be found, but you'll have to be quick. Now, let's talk about "reaching out." You see, Munch Mobile™ is

not your average car. He has, well, arms...long ones at that, which, at your coaxing with the joystick, grab at the goodies along the way. It looks really easy...but remember, looks can be deceiving. About that fuel, don't forget, if you run out, so does Munch Mobile™. So, have a nice trip!!!

Munch Mobile™ is manufactured under license from SHK Electronics Corporation
